

Privilege Finance Dissertation Sponsorship

Are you a student completing an energy from waste or renewable energy technology dissertation? Would you like to win up to £1,000 and gain access to a range of industry contacts?

Privilege Finance is currently looking for students whose project or dissertation is linked to the following topics:

- Energy from waste
- Renewable energy technology for anaerobic digestion
- Renewable energy engineering for anaerobic digestion
- Carbon capture
- Energy storage technology
- Renewable heat technologies
- Hydrogen
- New emerging technology

Privilege is a leading specialist funding provider for energy from waste projects, having invested in over 60MW of projects in the UK.

In exchange for access to your work the winner of the prize will win one day of mentoring with the Privilege team, and access to the business' contacts and network for a 12-month period, along with £1,000 upon completion of the project. Two runners up will also receive the same mentoring and networking opportunities, along with £750 upon completion of the project.
